AARC Spring '93
Club Roster

From First To Saudia Arabia To The Last Voice From Kuwait

Our guest speaker at the March meeting, Lee Wareham, KL7DTH, took his audience with him on a trek from the cold outback of Alaska to the hot desert of Saudia Arabia. In between, he told us of his adventures in Providenya, the Bering Strait (or on it!), Panama and Puerto Rico, with the Alascom Quick Response Satellite Ground Stations.

The program traced the developement of the quick response unit and equipment from its beginnings in 1976 when Alascom was asked by the military to assist in a Long Range patrol exercise. We heard about evolution of the equipment as well as the people Lee met and worked with along the way.

Lee and company were there for the Friendship Flight to Providenya in 1988, the Bering Bridge Expedition in 1989, the Noriega pickup in Panama and the Hurrican Hugo clean up in Puerto Rico.

However, the longest assignment for the group was with Desert Storm. One of the Health and Welfare 'telephone' stations set up by Alascom

handled over 490,000 morale calls from the 3rd Amoured Cavalry site.

As a follow up to the March program, Rick Marvin, KL7HF, will bring a new ARRL videotape to the April meeting about the "Last Voice From Kuwait". The program will show us what was happening on the other side of the lines while Abdul Jabbar Marafi, 9K2DZ (& A92ET) was operating clandestinely on the AMTOR APLINK nets.

Abdul relayed many health and welfare messages to and from Kuwait during the occupation and was also able to get out information that assisted us during the conflict.

Needed - Ham Volunteers

Need seven hams to accompany a Bike-Trek from Anchorage to Talkeetna. American Lung Association of Alaska May 8th and 9th. Food and lodging furnished for the night of the 8th. Contact Gladys, NL7JB, at 276-5864 or George, NL7RD, at 562-5796. Sounds like a fund deal!

The Anchorage Amateur is the monthly newsletter of the Anchorage Amateur Radio Club. Permission is granted for reproducing articles appearing in the Anchorage Amateur that do not indicate a copyright separate from the Anchorage Amateur Radio Club. Letters to the Editor and articles for publication should be submitted to Harvey Rookus, NL7DK, 3310 Checkmate Drive, Anchorage 99508. Telephone number (907) 333-4693. Submissions to the paper should be typewritten or on IBM compatible formatted computer disks (5.25 or 3.5 inch). Graphic illustrations for articles are welcome. Deadline is the 20th of each month.

Just a reminder, it's almost what passes for Spring in Alaska, and as our thoughts turn to Antennas and Spring Cleaning, the club will be having three 'Highway Cleanup Days' this year alongside of the Seward Highway next to Potter's Marsh. Harley and Arlene Steward, the coordinators for the project want to remind us that we'll be getting together for the cleanup in May, July and September. Be There If You Can, It's A Lot Of Fun!

Minutes From The General Meeting

By: NL7DL, Lil Marvin

The general meeting of the Anchorage Amateur Radio Club was opened Friday, March 5, 1992, at 7:00PM, by Vice President Joan Beller, AL7NK. Introductions were made.

Bill, AL7MM, head of the AARC election committee, reports that the following positions are open for re-election: President, Vice President, Secretary, Treasurer, Activities Manager, one three-year Board member, and six one-year Board members. If you are interested in running for one of the above positions, or have some possible suggestions, please contact Bill at 345-1667.

Rick and Lil's amateur radio class is in full swing, with a full crew of students. the class is meeting at Central Lutheran Church from 6:30 to 9:00PM Tuesday and Thursday evenings. If you have any questions regarding this or future classes, call Rick or Lil at 277-6741.

The PARKAS report that their next meeting will be held on Saturday, March 27th, beginning with breakfast at Jackie's Place, 2636 Spenard Road, right across the street from the Denali Theater. Breakfast will be followed by a transmitter hunt. NL7DL will be the bunny. the

frequency will be 145.55 simplex. Anybody who wants to join us--OM's or YL's--are welcome. Lil promises to stay stationary within Anchorage boundaries.

The program was presented by Lee Wareham, KL7DTH. Wareham gave a very interesting, and often humorous, report on Alascom's communications rapid deployment capability. The discussion included slide pictures of the International Dateline between Big and Little Diomed Islands; Panama City, Panama; Saudi Arabia; and Provideniya, Russia, as well as many areas in Alaska. Next time you see Lee, you might ask him about how long it takes a couple of "fat old men" to remove a large berm of snow in the bush in order to clear a level space for a two-ton communications van. You might also ask him why he sometimes didn't carry a camera in certain areas of Saudi Arabia during Operation Desert Storm. Fascinating program, Lee!

The raffle drawings were held, and the fixes, erh, prizes, were awarded. If he doesn't soon start offering bags of M&M's for the raffle, Lil is going to give Richard, AL7MO, 30 lashes with a wet rubber ducky!!

The eatin' after the meetin' was held at Elmer's as usual. The group was a small one, but very enjoyable!

Respectfully Submitted (in your dreams)

Lil Marvin, NL7DL

Minutes From The Board Meeting

By: NL7DL, Lil Marvin

The Anchorage amateur Radio Club board meeting was opened at 7:00PM by President Fred Wegmer, KL7HFM. The board meeting was held in Room 103 of the Carr-Gottstein Building at Alaska Pacific University. In attendance were the following board members: KL7HFM, AL7BB, AL7MO, NL7DL, KL7IKS, AL7BK, AL7HX, NL7UH, and AL7ID. Also present were the following: WL7EC and WL7BF. We did not have enough members present for a quorum.

Richard, AL7MO, is now our [interim] acting treasurer. Richard also reports that he is working on obtaining a Field Day site for the AARC. The property involved is located near the

corner of Northwood and Raspberry Road. It belongs to the National Bank of Alaska. He will need a written proposal to present to the NBA from AARC.

John, AL7ID, proposed another area, near the Raspberry Road and Northwood area, for a Field Day site. It is located on the east side of Minnesota near a large snow dump and a gravel path. If anybody else has any ideas for a Field Day site, please present them to Fred KL7HFM.

The American Radio Relay League has filed a comment with the Federal Communications Commission in support of Alaska's position on keeping the

(Continued On Page 7)

REAL LIFE SKETCHES

By Harvey Rookus, NL7DK

Dear Harvey,

Was sure surprized to get your letter. Haven't had contact with any Alaskan hams in quite some time - although my XYL Nancy (ex-KL7ANG) talks to Maggie Fulton now and then on the telephone (just about called it the "land-line" - but it sure isn't that any more what with satelites and all that!)

Now that I think on it a little, I guess I was the first trustee of KL7AA - at least I was the first one to put it on the air. We first fired it up actively to send code-practice as a club activity. We had obtained some Boehme equipment as a donation from somebody, and could get tapes from ARRL - so away we went. Several other guys pitched in to help with the sessions, which if I remember right, were on the air 3 nights a week. I was always the physical custodian of the equipment (transmitter and the tape equipment - although we frequently used my rig as the transmitter).

This program went on, off and on, for four or five years - and it seemed to really be used by a lot of the prospective hams. It was fun most of the time, but after a few years, got pretty boring. The really fun times were when we had a special once-a-month session in which we suspended normal practice transmissions, and sent five-minute transmissions at every five-word per minute speeds clear up to 40 wpm. We had a number of old-timers in the CW business scattered around Alaska, and we had some interesting feedback from the, when they tuned in just to see if they could still "cut-it". but that high-speed stuff sure took a lot of tape!

This chit-chat is really begging the issue on why you wrote - when, where, and how did the club get the AA call? On this, I am afraid I'm not going to be able to shed much light. At that time, Harold DeVoe was FCC Inspector, and I contacted him. Some of us in the club had heard that the club had the club call of KL7AA, and Harold verified that this was true. He sent me an FCC form which I filled out, and the club voted me trustee, we sent the form in, and I got the license!

Who originally applied for the call, etc., I have no idea - although, for some reason I can't explain, the name Crowley seems associated with that call. He was an engineer at the national Bureau of Standards in a lab there in Anchorage, and an active ham. Maybe this will tickle someone else's memory about this. My call was KL7BK, and I got it in '46, so not too much time could have elapsed from the start of re-licensing in '46 (which is when it started) when AA would have been issued.

Well, I have trouble with never signing off, and I've run on and on without telling you what you want to know, so I WILL call it quits. If there is more I might help with, let me know.

Sincerely & 73

Jack M. Walden

*Part Two Of A Six Part Investigative Scientific Research Series Into***AURORA DISTURBANCES ON HF PROGAGATION**

By B. B. Capers, AL7BB

Now that we have established the fact that much scientific research has gone into the strange effects that the Aurora has on HF propagation, let us dig deeper into some not so scientific observations this writer has discovered.

First, we have to establish that the Aurora Borealis, or Northern Lights are only found in the Northern Hemisphere, and that the center of this Hemisphere is the North Pole. Therefore, if one stands at this pole, any direction one faces must be South. there can be no East or West, only South. With this in mind, it is safe to assume that this Aurora can only be bi-directional, with no lateral movements allowed. This is the reason that the greatest disturbances are found in the far northern latitudes, with minor disturbances in the southern latitudes, north of the Equator.

It has also been noted that with the brilliant display of the lights, shortly thereafter there is a partial, or total loss of propagation. This propagation is not reflected or scattered in the area where the Aurora is seen, therefore, it is safe to assume that all radiated signals must be consumed or gobbled up by some unseen creature. There have been reports of signals being reflected off this unseen monster, and their reception has been weak and watery, however these signals do not exist in the area where the lights are observed.

Through the history of mankind, there have been those who have set out to discover those things lost by our ancestors. Man has discovered the hidden chambers of the Pyramids, the Hairy Mammoth of the ice ages, and the prehistoric birds and animals trapped in ice and limestone formations throughout the world. I feel that there are many things that we mortals have not yet discovered, and that the age of discovery will continue for many years to come.

Now comes the shocker. I have discovered the real reason of the so called Aurora. It was quite by accident that I saw it. One night when the bands were dead, I was outside in the cool, minus 20F evening, shaking and rattling my tower, for I was sure the TA-33 was the culprit, when through the light cast by a full moon, I saw a strange shadow on the snow. I immediately looked up, only to see a bare sky, however the shadow was there on the snow again. What I saw made me blink twice, and break away the ice formations from my eyebrows.

It was the outline of a bird, but such a bird I have never seen before. It had a long tapered neck and snout, and a body large and bulbous which reminded me of a giant solder-sucker. Its wings were short and their beat was as rapid as that of a hummingbird. Their pitch was well above anything that we mortals would be able to hear, and its tail was large and fanned much like that of a peafowl.

Again, I searched the sky for a direct sighting of this creature, only to be greeted by a barren empty view. Not being one to be frightened by a shadow,

I calmly ran over our blind dog Dfae, who was trying to find her way to the door after doing her evening business, managed to slip on the icy steps and peeled my shin bone from ankle to knee, and then ran my hand through the storm glass in the door while in my casual haste to grab the handle. Nonchalantly I walked into the kitchen, where my sweet wife inquired as to the yelp of the dog, and the clatter on the steps, and I tried to calmly explain to her what I had just seen while at the same time, downing the better part of a fifth of White Lightning.

The next morning, or maybe afternoon, I don't really remember, I tried to digest what I had observed the previous evening, and think I have found the cause of this observation, however this will have to be discussed at another time.

**AL7BB Arctic RF
Research Centre**

Dear Editor:

A draft environmental impact statement (DEIS) for the construction and operation of a high frequency active Auroral research program (HAARP) facility is being circulated throughout various agencies in Alaska. This document describes the potential environmental impacts of operating a proposed ionospheric research facility at Gakona or Clear, Alaska.

Public hearings on this proposal are scheduled at:

Glennallen High School
Tuesday, April 6, 1993 (7PM)

Anderson Combined High School
Thursday, April 8, 1993 (7PM)

The review and comment period ends April 25, 1993. Any written comments can be sent to:

Mr. John Heckscher
PL/GPIA
Hanscom AFB, MA 01731-5000

The HAARP consists of the following units:

The Ionosphere Research Instrument (IRI) will operate and frequency hop from 2.78 to 10.0 MHz with the power level over one (1) gigawatt ERP. The antenna beam will cover a maximum cone angle of 60 degrees centered on the zenith.

Another unit called a Vertical Incidence Sounder (VIS) will transmit in the 1.0 to 15.0 MHz band operating at a lower power. This unit will be used to select the operating frequencies of the main unit.

Still another unit called a Incoherent Scatter Radar (ISR) would transmit in the 440-450MHz band. It will be used as a diagnostic instrument for detailed assessments of background ionosphere and changes induced by the main unit. this unit may be located at Bear Creek.

An Optical Imager and Magnetometer, and Light Detection and Ranging (LIDAR) unit.

The HAARP emitters will not operate continuously. The main unit will operate up to five campaigns a year, each of a four week duration of eight hours a day. The VIS unit would operate 12 hours a day during the same period and the ISR would operate every half hour during periods when the main unit is not operating.

It is not known what effect this HAARP unit will have on HF transmissions in Alaska, the DEIS claims none. This is based on data from a similar unit currently operating in Troms, Norway.

Depending on distance and type of device, the following equipment will be impacted: Cellular Telephones, HF communications, Television Broadcast, AM radio, VHF radio and Avionics.

The possibility exists that distorting the ionosphere with the HAARP may enhance, degrade or completely black out HF and VHF communications during its period of operation.

In addition to the above proposed installation, the University of Alaska is proposing to build and operate via remote control, a HF research radar near King Salmon. It will operate in the band of 6 to 20 MHz, with a different frequency to be selected each day. the maximum ERP will be near 2 megawatts of pulsed power. the beam width would be 52 degrees and the azimuth near 45 degrees from King Salmon. This would put Anchorage in the beam of the transmitter.

Between these two units, there is a possibility that the ionosphere could so screwed that we could encounter interference to all HF communications during the periods of operation. The VHF shot between Anchorage and Minchumina could very well be affected. There is no way of predicting which way the affect will be, positive and re-enforced or negative with total black out.

Limited copies of the "Electromagnetic and Radio Frequency Interference" which was extracted from the DEIS document can be obtained from myself (see below). If you would like to read the entire environmental impact document, I can make it available on a very short term basis, for I am required to comment before the deadline.

KL7CDG,
Jim Tvrdy, President

AARC GENERAL MEETINGS are held on the first Friday evening of each month in Room 102 of the Carr-Gottstein Building on the Alaska Pacific University Campus.

The campus is located at 4101 University Drive and Bragaw Streets. Parking is available only in the lot to the northeast of the building.

The meetings begin at 7:00 PM and visitors are always welcome! The AARC legendary raffle is open to everyone.

AARC BOARD MEETINGS are held on the second Wednesday evening of each month in Room 104 of the Carr-Gottstein Building on the APU campus.

The meetings begin at 7:00 PM and are open to all club members and visitors.

AARC MID MONTH SOCIALS are held on the third Wednesday evening of each month (except June, November and December). They begin at 7:00 PM at the Royal Fork Buffet Restaurant, 800 Northway Drive.

Visitors are always welcome!

THE KL7AA REPEATERS

sponsored by the club are on 146.94 (at minus .600), 224.94 (-1.600) and 444.7 (+5.000). The two meter repeater located on top of Flattop Mt. requires a 100 hz tone for access.

The satellite receiver located on Government Hill does not require a tone. The 125 cm repeater, also on Flattop Mt. and the 70 cm repeater located at the South Central Radio site do not require tone for access. The repeater trustee is William Reiter, KL7ITI. Doug Dickinson, KL7IKX, is chairman of the VHF/UHF committee.

KL7AA-7 PACKET OPERATIONS

Ports are 145.01 mhz, 147.96 mhz and 445.05 mhz at 1,200 Baud; 7108.5 khz at 300 Baud and 445.11 mhz at 9600 Baud. Remember that 147.96 mhz is normally in use as the Iceworm link to other Alaskan communities and limit use of that port to evening hours.

A landline port is available at 300-9600 Baud, V32.bis compatible; registration is required, contact Sysop John Lawson, NL7NC, at 337-2467 for info, or contact alternate Sysops Doug KL7IKX, Paul WL7BF, Jim NL7C, Merle AL7LD or Bill AL7MM.

FREE LICENSE EXAMS are held on the first Wednesday evening of the month at 6:30PM in the Carr-Gottstein Bldg on the APU campus and on the third Wednesday evening of the month in Eagle River at 7PM in the basement of the VFW Hall. For more information contact VEC Director, Roger Hansen, KL7HFQ at 892-6365.

ANCHORAGE ARES NET

The Anchorage area Amateur Radio Emergency Services net is held each Thursday evening at 8:00 PM on the KL7ION repeater on 147.3 (+.600). Net Control is Lil Marvin, NL7DL and alternate NCS station is KL7IO. The Westlink Amateur Radio report, Swap N Shop and the Parka Net follow the ARES net on the same frequency.

AARC MEMBERSHIP DUES are \$20.00 regular, \$25.00 family and \$10.00 student. Dues are due one year from date of last payment. There is a 30 day grace period. Life memberships are available. Contact Lance Dunbar, AL7BK, (H) 337-6297 or (W) 561-5457. Please remember that the club receives \$2.00 for each ARRL membership renewal and \$5.00 for each new ARRL membership if they are processed through the AARC.
